

Slider Feature Phone with Keypad

This slider mobile phone has a compact design and physical keypad. Basic mobile phone functions include calling, texting and multimedia playback.

Overview

Compact Slider Design

The K86 slider mobile phone combines a classic, compact form factor with modern convenience. Featuring a smooth slider mechanism that reveals a tactile physical keypad, this device is designed for reliability and ease of use. It includes essential communication features, a clear TFT display, and multimedia capabilities, making it an ideal choice for users seeking a straightforward and durable mobile solution.
