

Slider Feature Phone with Keypad

This slider-style mobile phone features a compact design and a physical keypad. It supports calls and text messaging, with a slider that protects the keypad.

Product Overview

Compact Slider Design

The GK201 is a functional slider-style mobile phone designed for simplicity and reliability. Featuring a compact form factor with a protective sliding mechanism, it keeps the physical keypad secure when not in use. This device is ideal for users seeking a straightforward mobile experience focused on essential communication.
