

Slider Mobile Phone with Keypad

This slider mobile phone features a touchscreen display and a slide-out alphanumeric keypad in a compact design. It supports multimedia playback, Bluetooth, USB, and also includes a camera.

Overview

Compact Slider Design

This slider mobile phone combines a modern touchscreen display with a classic slide-out alphanumeric keypad for versatile input options. Engineered for portability, its compact form factor makes it an ideal choice for professional users who value efficiency and ease of use. The device supports essential multimedia functions, including audio and video playback, as well as integrated camera capabilities for capturing on-the-go content.
