

# Sliding Glass Lid Chest Freezer

This chest freezer features a quick and deep freezing capability. It has mechanical temperature control using an adjustable thermostat and utilizes environment-friendly technology with a CFC-free foaming agent.

## Product Overview

### Professional Sliding Glass Lid Chest Freezer

This international standard chest freezer features curved sliding glass lids, providing easy access and clear visibility for stored goods. Designed for both commercial and residential use, it combines efficient, quick-freezing capabilities with a fashionable, elegant appearance. The unit is built with environment-friendly technology, ensuring low energy consumption and quiet operation.

## Performance & Technology

### Environmental Standards

CFC-Free Foaming • Eco-Friendly Technology

### Cooling Capabilities

Quick Freezing, Deep Freezing, Mechanical Temperature Control

## Design & Convenience

### Design Highlights

- Curved sliding glass lids
- Adjustable thermostat
- Defrost drain
- Casters for mobility
- Interior wire basket for organization

### Operational Noise Level

Low noise design

### Energy Profile

Low energy consumption
