

Slim Cooker Hood with Aluminum Grease Filters

This slim cooker hood features a 3-speed pushbutton switch and can be used in either exhaust or recirculation mode. It is available in powder-coated white, gray, black, or brown, as well as stainless steel, and includes washable aluminum grease filters.

Overview

Efficient Slimline Ventilation

The AH2560 slim cooker hood is designed to provide effective ventilation for modern kitchens with limited space. This compact 60cm unit features a powerful single-motor system with three speed settings and dual-mode operation, supporting both exhaust and recirculation configurations. Its durable construction includes washable aluminum grease filters, ensuring long-term performance and easy maintenance for professional kitchen environments.
