

Slow Masticating Juicer

This kitchen appliance extracts juice from fruits and vegetables using a slow juicing mechanism for maximum nutrient retention. It features multiple speed settings and a reverse function to prevent clogging.

Product Overview

Professional Masticating Juicer

This kitchen appliance is engineered for superior juice extraction, utilizing a slow-speed mechanism to maximize nutrient retention and significantly minimize oxidation. Designed for both efficiency and durability, it features a robust motor capable of handling a wide variety of produce. With user-friendly controls, including multiple speed settings and a reverse function, this unit ensures a smooth, clog-free juicing experience for any professional or home kitchen environment.

Technical Specifications

Motor Capabilities

- Robust motor for high-efficiency operation
- Multiple speed settings for various produce types
- Reverse function to prevent clogging

Safety Standards

Overload Protection, Secure Locking Mechanism

Design & Maintenance

Design Highlights

- Compact footprint for easy storage
- Modern aesthetic design
- Easy disassembly for convenient cleaning
