

Slurry Pump for Mining Applications

This slurry pump is designed for use in the mining industry. It has a size range of 1”to 18” / 25 mm to 450 mm, capacities to 22,000 gpm / to 5,000 m3/hr, and heads to 240 ft / to 73 m.

Overview

Heavy-Duty Slurry Pumping Solution

This cantilevered, horizontal centrifugal slurry pump is engineered for demanding industrial environments. Designed specifically to handle highly abrasive and high-concentration slurries, it ensures reliable performance in challenging conditions. The unit supports multi-stage series installation, offering flexibility for complex operational requirements.

Technical Specifications

Pump Type	Cantilevered, horizontal centrifugal slurry pump
Installation Capability	Multi-stage series

Applications

Industry Applications	Metallurgy, Mining, Coal, Power
-----------------------	---------------------------------

Certifications

Compliance Standards

CE • ISO 9001 • UKAS • Environmental Management System
