

# Slurry Pump Replacement Parts

These replacement parts are for slurry pumps used in industries such as mining and metallurgy. The parts are abrasion and corrosion resistant and can be made of hard alloy metal or rubber.

## Product Overview

### High-Performance Slurry Pump Replacement Parts

These precision-engineered slurry pump replacement parts are designed to restore and maintain the peak efficiency of industrial pumping equipment. Our extensive inventory includes critical wear components such as impellers, liners, and bearing assemblies, all manufactured to meet demanding operational requirements. Available in advanced high chrome alloys and durable natural rubber compounds, these parts ensure long-term reliability and resistance to abrasive conditions.

## Material Composition

High Chrome Alloy Options	A05, A07, A49
Natural Rubber Options	R08, R26, R33, R55

## Service Capabilities

Custom OEM Services	Yes
---------------------	-----

## Component Inventory

### Key Wear Parts

- Impeller (Open/Closed)
- Volute Liner
- Throat Bush
- Front/Back Liners
- Expeller & Expeller Ring
- Shaft & Shaft Sleeve
- Case & Cover

### Mechanical & Structural Parts

- Bearing Assembly
- Bearing Cartridge
- Stuffing Box
- Lantern Restrictor
- Cover Plate Bolt
- Neck Ring
