

Slurry Pump Throat Bushing

This throat bushing is designed for slurry pumps, offering exceptional abrasion and corrosion resistance. It is available in hard alloy metal (Cr27, Cr28, CD4MCu) or with an optional rubber liner.

Product Overview

Slurry Pump Throat Bushing

This high-performance throat bushing is engineered for demanding industrial slurry pump applications. Designed to maintain internal pump efficiency, it provides exceptional resistance to abrasive wear. These precision-cast components ensure optimal clearance and service life in even the most challenging operating environments.

Material Specifications

Available Materials

A05 High Chrome, A07 High Chrome, A49 High Chrome, R08 Natural Rubber, R26 Natural Rubber, R33 Natural Rubber, R55 Natural Rubber

Scope of Supply

Compatible Components

- Impeller (Open/Closed)
- Volute Liner
- Front and Back Liners
- Shaft and Shaft Sleeve
- Bearing Assembly
- Expeller and Expeller Ring
- Stuffing Box

Service Capabilities

Tailored Solutions

We provide comprehensive OEM services to meet customer-specific requirements, ensuring that every component is engineered to fit unique pump assemblies and performance needs.
