

Small Capacity Instant Noodle Production Line

This small capacity fried instant noodle production line features efficient and reliable instant noodle production. It realizes high automation, convenient operation, low energy consumption and a small footprint.

ADDITIONAL IMAGES

Overview

A compact and efficient production system designed for automated noodle manufacturing.

Compact Noodle Production Solution

This small-capacity fried instant noodle production line offers a perfect balance of compact design and high-efficiency performance. Ideal for small-to-medium enterprises, the system enables the complete process from flour feeding to finished product in a single, automated line. Designed for versatility, it allows for adjustable noodle thickness, width, and shape to suit diverse market requirements.

Technical Specifications

Capacity

8000 pcs/8h

Minimum Output

10000 pcs/8h

Maximum Output

Construction Material

Stainless steel

Voltage Compatibility

380V/50Hz (Three Phase), 220V/50Hz (Single Phase), Customizable

Operational Features

The production line produces uniform, pre-fried noodle portions ready for final packaging.

Production Flow

- Flour mixing
- Compounding
- Boiling
- Cutting and bending
- Frying
- Cooling
- Packaging

Supported Shapes

Round • Square • Rectangle

Base Ingredient

Wheat flour
