

Small Engine Cylinder

This high-performance cylinder is designed for small engine applications. It features durable cast construction with precision-machined surfaces for optimal sealing and heat dissipation.

Product Overview

High-Performance Small Engine Cylinder

This high-performance cylinder is engineered for durability and reliability in small engine applications. Featuring a robust cast construction with precision-machined surfaces, it ensures optimal sealing and efficient heat dissipation. The design incorporates multiple cooling fins to maintain consistent operating temperatures, while optimized ports facilitate superior gas flow for enhanced engine power.

Technical Details

Compatible Equipment	Chainsaws, Brush Cutters, Trimmers, Portable Power Equipment
Surface Treatment	Black color treatment
Construction	Durable cast construction
Cooling Method	Integrated cooling fins
