Product Overview

Compact Flour Processing Solution

This small-scale flour production line is designed for efficient, reliable milling of various food crops. It features a compact, integrated system that minimizes footprint while maximizing output quality. Engineered for simplicity, it offers low-noise operation and ease of maintenance, making it an ideal choice for small to medium-scale food processing operations.

Technical Capabilities

System Highlights

- Low noise operation
- Energy efficient
- Small footprint design
- High output capacity
- Easy installation and operation

Production Stages

- Cleaning
- Grinding/Milling
- Sifting
- Pneumatic conveying
- Packaging

Compatible Raw Materials

Wheat, Corn, Sorghum, Soybeans, Dried Potatoes, Dried Chili, Dried Bananas, Dried Cassava

System Configuration

Construction Materials

Stainless Steel Hoppers • Robust Steel Frame

Key Hardware Components

- Input hoppers
- Interconnected conveyors
- Milling and grinding units
- Cyclone separators
- High-efficiency sifters
- Fabric dust collectors
- Automated control panel
