

Small Gasoline Engine 5.5 HP

This small gasoline engine is designed for various applications. It features a 5.5 horsepower output and an electronic ignition system.

Product Overview

Compact Power Solution

This 5.5 HP gasoline engine is a versatile and compact power solution designed for a wide range of industrial and commercial applications. Engineered for reliability, it features an electronic ignition system that ensures consistent performance and easy starting. Its robust design makes it an ideal choice for powering generators, water pumps, and various small machinery equipment.

Technical Specifications

Power Output

5.5 HP

Horsepower

Ignition System	Electronic Ignition
Fuel Type	Gasoline
Model Designation	GX160

Design & Features

Finish

Yellow

Design

Compact

Applications

Typical Applications

- Generators
- Water Pumps
- Small Machinery
