

Small Scale Flour Milling Machine

This family-style plant is designed for easy operation and is suitable for grain processing. The system is engineered for small-scale flour production and ease of maintenance.

ADDITIONAL IMAGES

Overview

Compact Grain Processing Solution

This family-style flour milling machine is designed for efficient and reliable grain processing in small-scale environments. It features a robust, compact structure that minimizes space requirements and reduces operational costs while providing a fast return on investment. The system integrates grinding, sifting, and separation processes into a single unit, ensuring consistent performance for various grain types.

Technical Features

Processing Capabilities

- Integrated grinding
- Multi-stage sifting
- Cyclone separation
- Adjustable fineness settings
- Adjustable output control

Supported Grains

Wheat, Corn, Rice

Certifications

Quality Standards

ISO 9001 • SGS Certified

Operational Details

Design Benefits

Feature	Benefit
Compact Structure	Saves floor space and reduces operational costs
Modular Design	Easy maintenance and cleaning
Control Panel	Simplified operation and monitoring
