Overview

Versatile 12-Ton Truck Crane

This robust 12-ton truck-mounted crane is engineered for demanding lifting tasks in construction and infrastructure projects. It features a telescopic boom and an EFI supercharged engine for high efficiency and reliability. The vehicle is equipped with a dual-power oil and electricity system, 360-degree rotation, and multiple hydraulic safety features to ensure precise material handling.

Performance

Key Performance Metrics

13000 kg

Max Lifting Capacity

85 km/h

Driving Speed

15 KW

Motor Power

Technical Specifications

Crane and Chassis Details

Feature	Specification
Boom Configuration	7 meters (6 or 7 knots)
Dimensions (LxWxH)	9.6 x 2.2 x 3.1 m
Weight	14000 kg
Tires	825-20
Turntable	1.4 m internal tooth

Features

Operational Capabilities

- Dual oil and electricity motor system with all-copper core
- Double pump confluence for hydraulic efficiency
- 360-degree continuous turntable rotation
- Planetary reduction mechanism for stable lifting
- Five enlarged and extended hydraulic outriggers
- Hydraulic cooling system
- Air brake system

Safety & Driver Support

Double hooks, Double winches, Steering assistance, High/Low speed driving, Luxury double cab
