

Smart Access Control Card

The smart access control card is used for secure entry into facilities. It stores and transmits data wirelessly to grant access.

Product Overview

Professional Plumbing Solution

The Smart Access Control Card (D-3H) is a specialized plumbing tool engineered to efficiently clear blockages in drains and pipes. Featuring a flexible cable design, it effectively navigates plumbing configurations to break up or retrieve stubborn obstructions like hair and grease. This durable tool is an essential asset for maintenance professionals requiring a reliable solution for sinks, showers, and toilets.
