

# Smart Bladeless Fan with Air Purification

This smart fan combines cooling, heating, and air purification functionalities into a single device. It features a bladeless design with a digital display showing temperature and air quality readings.

## ADDITIONAL IMAGES

## Product Overview

### Advanced Climate and Air Quality Control

This innovative bladeless fan integrates high-efficiency air purification, rapid 2100W PTC heating, and powerful cooling capabilities into one sleek unit. Designed for modern environments, it features intelligent monitoring that tracks air quality and temperature in real-time with a built-in particle sensor. With 350-degree oscillation and turbo-charged airflow, this device ensures uniform comfort and cleaner air throughout your space.

## Performance Specifications

### Key Performance Metrics

**3 s**

Heating Response Time

**2 x**

Air Pressure vs Standard

Heating Power	2100 W
Max Air Delivery Distance	5 m
Oscillation Angle	350 degree

## Smart Features

### Real-time Monitoring Sensors

- Particle Sensor (PM2.5)
- Temperature Sensor

Operational Modes	Sleep Mode, 1-7H Timer, Remote Control, Formaldehyde Decomposition
