Overview

Comprehensive health tracking with mobile app synchronization and multi-user support.

Comprehensive Body Composition Analysis

This Smart Bluetooth Body Fat Scale provides a complete health overview by measuring over 18 body health indicators, including weight, BMI, muscle mass, and body water. Equipped with advanced BIA biometric technology and four high-precision sensors, it ensures accurate and reliable data tracking. The scale features seamless smartphone integration via Bluetooth 4.0, supporting multiple user profiles for a comprehensive family health monitoring solution.

Performance Metrics

Key Performance Indicators

Body Composition Tracking

Measured Parameters

Body Weight, Body Fat Percentage, BMI, Muscle Mass, Body Water, Bone Mass, Muscle Rate

Connectivity & Compatibility

Bluetooth Version	4.0
App Synchronization	Google Fit, Fitbit, Health Fit, iOS Compatible, Android Compatible
App Language Support	14 Languages

Technical Specifications

Product Dimensions	310 x 319 x 24 mm
Display Type	Backlit LCD (White digits on black background)
Display Dimensions	91mm x 44mm
Sensor Technology	BIA Biometric Technology with 4 High-Precision Sensors

Power & Operation

Operational Features

- Auto Power-On/Off
- Auto-Zero Calibration
- Low Battery Indication
- Overload Indication

Power Requirements	4 x AAA batteries (included)
