Overview

Smart Body Composition Analysis

This high-performance smart body composition scale utilizes advanced ITO tempered glass technology and TUYA solution chips for seamless WIFI connectivity. Designed for comprehensive health monitoring, it automatically syncs data to the Smart Life app, allowing for easy tracking of multiple family members. With its high-precision sensors and sleek design, it provides an accurate, user-friendly experience for professional-grade body analysis.

Physical Specifications

Platform Dimensions	300 x 300 x 21 mm
Platform Material	6mm ITO tempered glass
Net Weight	1.6 kg

Performance

Weighing Range	5 - 180 kg
Division Value	0.1 kg
Sensors	4 precision strain gauge sensors

Connectivity & Smart Features

Comprehensive body composition analysis and seamless app integration.

Connectivity

WIFI • TUYA Solution

App Features

- Multi-user support
- Auto-transfer measurements
- Family sharing
- Remote health monitoring

Measurements

Supported Metrics

Weight, BMI, Body Fat, Water Content, Muscle Mass, Visceral Fat, Protein, Bone Mass, Physical Age, BMR

Power & Operation

Power Source

3 x AAA batteries (included)

Display Type

LED with white digits

Operational Features

Step-on, Auto-off, Overload indication, Low battery indication
