

Smart Card

Smart cards provide a secure method of access control. They are used for managing entry and exit in various security systems.

Product Overview

High-Performance Digital Power

These Super Alkaline batteries are engineered specifically for high-drain digital electronics that require consistent and reliable energy. Designed with a mercury-free composition, they provide an eco-friendly and long-lasting power source. The robust design ensures stable performance across a wide range of household and professional digital devices.

Technical Specifications

Battery Chemistry	Super Alkaline
Nominal Voltage	1.5 V
Size Format	AA
Environmental Compliance	Mercury-Free, Hg=0

Applications

Recommended Applications

- Digital cameras
- Portable gaming devices
- Wireless mice and keyboards
- Remote controls
- Flashlights
