

Smart Card for Access Control

This is a smart card used for access control systems. It provides a secure method for personnel identification.

Product Overview

Advanced Access Control Solution

The Smart Card for Access Control is designed to provide secure and efficient entry management across various professional environments. It integrates seamlessly with existing security infrastructure, supporting robust authentication protocols for logistics, warehouse, and supply chain facilities. This solution enhances operational security while facilitating controlled access to sensitive storage and administrative zones.

Technical Features

Standards & Compliance

ISO Certified, Encrypted Data, High Durability

Operational Performance

Performance Metrics

13.56 MHz

Operating Frequency

100000 cycles

Write Cycles

Deployment Applications

Target Environments

- Warehouse Access Management
- Supply Chain Logistics
- Inventory Control
- Facility Security Systems
