

Smart Electric Kettle with WiFi Control

This smart electric kettle connects to WiFi, enabling remote control and monitoring of water temperature. It features a 1-liter capacity, glass body, stainless steel infuser, and preset temperature settings, with physical buttons for manual operation.

Product Overview

Smart Connectivity meets Versatile Brewing

This advanced 2-in-1 smart kettle and tea maker offers ultimate convenience with integrated Tuya app support via WiFi. Designed for modern kitchens, it features precise temperature settings for specific beverage types like green tea, herbal infusions, and baby formula. The 1.5L capacity and dedicated infuser make it a versatile tool for both office and home environments.
