Smart Body Composition Analysis

This advanced smart bathroom scale integrates WiFi connectivity and Tuya-based IoT technology to provide comprehensive health monitoring. It features high-precision strain gauge sensors and a tempered glass platform, delivering accurate measurements for weight, BMI, muscle mass, and metabolic age. With a rechargeable battery and intuitive mobile app synchronization, it offers a seamless experience for tracking body composition trends over time.

Technical Specifications

Weighing Range	180 kg
Division Value	0.1 kg
Dimensions	300 x 300 x 13 mm
Power Supply	3.7V, 700mAh Rechargeable Lithium Battery (Type-C)

Features

Connectivity	WiFi, Tuya Smart Chip, Smart Life App
Display	LED with White Digitals (28mm segment height)

Body Metrics

Comprehensive Metrics

- Weight (kg/lb/st)
- BMI
- Body Fat %
- Muscle Mass
- Water Content %
- Protein Rate %
- Visceral Fat
- Metabolic Age
- Bone Mass

Construction

Materials and Safety

- 6mm Tempered Glass Platform
- 4 Precision Strain Gauge Sensors
- Rounded Safety Corners
- Overload Indication
- Low Battery Warning
