

Smart WIFI 3-Gang Light Switch

This smart WIFI switch allows remote control of three lighting circuits or appliances. It features a sleek design with touch-sensitive controls and integrates with smart home platforms for energy-saving benefits.

Overview

Smart Connectivity for Modern Lighting

This 3-gang smart WIFI switch offers sophisticated control for home automation, featuring a minimalist white glass finish and intuitive touch-sensitive surfaces. It enables remote operation of three independent lighting circuits via a dedicated mobile application or traditional manual switching. Designed for seamless integration, it supports standard wiring configurations and is compatible with major smart home platforms to facilitate voice control and energy management.
