Product Overview

Smart Lighting Control

This professional-grade smart dimmer switch provides seamless 0-10V control specifically engineered for LED lighting systems. Designed for reliable 120V operation, it integrates directly into modern smart home ecosystems via wireless WiFi connectivity. Users can easily manage light intensity and automate lighting scenes using the intuitive TUYA mobile application.

Technical Specifications

Dimming Protocol	0-10V
Operating Voltage	120 V
Wireless Protocol	WiFi

Certifications

Safety Standards	ETL, Intertek
------------------	---------------

Features

Primary Capabilities

- Remote control via TUYA app
- Automated lighting scenes
- Wall-mounted installation
- Energy-efficient light intensity adjustment
