

SMT Conveyor Belt for Yamaha SMT Assembly Lines

This conveyor belt is designed for use in Yamaha SMT assembly lines. It facilitates the reliable and precise transfer of components during the SMT process.

Product Overview

High-Performance SMT Conveyor Belts

These replacement conveyor belts are precision-engineered for use in industrial automated assembly lines. Designed for durability and operational efficiency, they ensure reliable component transfer during the surface mount technology process. Available in various conditions to suit specific budgetary and maintenance requirements.

Compatibility and Part Numbers

Supported Part Numbers

- KHY-M7132-00
- KM1-M7140-00X
- 90990-22J003
- KKE-M917H-00
- KKE-M9127-00
- KHY-M9129-00
- KJ2-M7137-00X
- KHY-M7131-00
- KHW-M9129-00X
- KGB-M7181-00X
- KGT-M7181-00X
- KGT-M913J-00X
- KGT-M916T-00X
