

SMT CR2032 Battery Holder

This surface mount CR2032 battery holder ensures reliable electrical contact and secure battery retention. Constructed from durable plastic, it features gold-plated contacts for corrosion resistance and optimal conductivity.

Product Overview

Compact Power Solution

This surface mount (SMT) battery holder is engineered for CR2032 series button cells, providing reliable electrical contact and secure retention. Constructed with durable PPS plastic and phosphor bronze, it ensures longevity and optimal conductivity for your electronic assemblies. Its compact design is ideal for space-constrained applications such as real-time clocks, memory backup, and various low-power devices.

Technical Specifications

Construction Materials

Component	Material
Metal Contacts	Phosphor Bronze
Housing	PPS Plastic

Mounting Type	SMT (Surface Mount Technology)
Compatible Battery	CR2032
Model Number	BS-2032-8
