

SMT Feeder Cover for 8mm Feeders

This feeder cover is designed for 8mm component tape feeders used in SMT machines. It is compatible with Panasonic CM402 and NPM series equipment, ensuring accurate component placement.

Product Overview

Precision Engineering for SMT Assembly

This high-quality feeder cover is designed specifically for 8mm component tape feeders, ensuring reliable operation and component protection during the assembly process. Precision-engineered for compatibility with standard high-speed pick and place machinery, it facilitates smooth and accurate component feeding. Its durable construction is built to withstand the rigorous demands of high-volume SMT production environments.

Technical Specifications

Compatible Feeder Size	8mm
Material	Durable Metal
Compatible Part Numbers	N210109641AA, KXFA1PQ9A00, KXFA1MQBA00

Compatibility

Compatible Machine Series

- CM402 Series
- NPM Series

Application

SMT Assembly • PCB Manufacturing • Pick and Place
