

SMT Feeder for CP Series Placement Machines

This SMT feeder is designed for use with CP series placement machines. It ensures accurate and consistent component feeding for surface mount technology applications.

Product Overview

Precision SMT Component Feeding

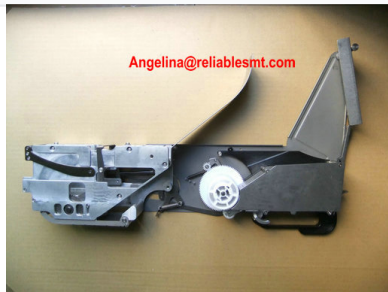

This high-performance feeder is engineered for seamless integration with CP series placement machines, ensuring reliable and accurate component delivery during the assembly process. Available in both original new and refurbished conditions, it supports a wide variety of tape widths to maintain high-speed production efficiency. Designed for demanding SMT environments, this equipment helps optimize placement accuracy and overall line throughput.

Compatibility

Compatible Machine Series

CP40, CP45, CP60

Specifications

High-precision feeder unit designed for CP series placement machines, ensuring reliable component delivery.

Available Feeder Widths

- 8*2mm
- 8*4mm
- 8mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Condition

Original New • Refurbished
