

SMT Feeder for Samsung SM Series Pick and Place Machines

This SMT feeder is designed for Samsung SM series pick and place machines, including SM481, SM482, and SM471 models. It ensures reliable component feeding for automated assembly processes with 12mm tape widths.

Product Overview

High-precision 12mm feeder optimized for SM series placement equipment.

Smart SMT Component Feeder

This high-precision 12mm SMT feeder is engineered for optimal component delivery in automated pick and place assembly lines. Designed for durability and performance, it ensures accurate and reliable feeding to minimize production downtime. Compatible with leading automated assembly machinery, it supports high-volume manufacturing environments requiring precise surface mount technology processes.

Compatibility

Supported Machine Series	SM481, SM482, SM471
--------------------------	---------------------

Technical Details

Feeder Width	12 mm
Manufacturing Origin	Korea

Availability

Available Feeder Series

- CP Series
- SM Series
- SME Series
- SM-IT Series

Supported Tape Widths

- 8
- 12
- 16
- 24
- 32
- 44
- 56
