

SMT Feeder Gear AA10R04 for NXT W08

This gear is designed for use in SMT (Surface Mount Technology) NXT W08 feeders. Identified as AA10R04, it ensures accurate component placement in automated assembly processes.

Product Overview

Precision Gear for SMT Feeders

This precision-engineered gear (AA10R04) is designed specifically for integration with NXT W08 feeder systems. Built for high-speed Surface Mount Technology (SMT) production environments, it ensures reliable component placement accuracy. Its robust construction and precise tooth geometry are optimized to minimize backlash and support consistent, long-term performance in automated assembly lines.

Compatibility

Compatible Systems	Fuji NXT W08, Fuji NXT 24mm
