

SMT Machinery 7.7M Cable Assembly

This is a 7.7-meter cable assembly designed for SMT machinery. It is used for signal and power transmission.

Product Overview

High-Precision Cable Assembly

This original new cable assembly is specifically engineered for high-performance SMT machinery. Designed to meet strict technical standards, it ensures reliable signal and power transmission within automated assembly environments. Built for durability and precision, this component is essential for maintaining the operational integrity of your Yamaha-compatible production equipment.

Technical Specifications

| | |
|----------------------|---------------|
| Part Number | KV7-M66F6-00X |
| Cable Length | 7.7 m |
| Component Type | C.CABLE ASSY |
| Manufacturing Origin | Japan |
| Package Quantity | 1 |
