Product Overview

Precision SMT Component Feeding

This high-performance SMT pick and place machine feeder is engineered for precision and reliability in high-speed electronic assembly environments. Designed specifically for the Samsung SM series, it ensures accurate and consistent component presentation to the pick-and-place head, minimizing downtime and optimizing production efficiency. The unit supports 8mm pitch components for seamless integration into existing SMT production lines.

Compatibility

Compatible Machine Models

SM471, SM481, SM482

Technical Specifications

High-precision SM-IT feeder unit designed for automated component handling.

The SM-IT series feeder is a critical component for maintaining pick and place accuracy.

Available Condition

- Original New
- Used
- Copy New

Feeder Type

SM-IT Series

Supported Component Pitch

8mm x 2mm
