

SMT Pick and Place Machine Nozzle

This pick and place nozzle is designed for surface mount technology (SMT) applications. It is a critical component in automated pick-and-place machines, ensuring accurate component handling.

Product Overview

Universal GSM Flex Head Nozzles

These precision-engineered pick-up nozzles are essential components for automated surface mount technology (SMT) pick-and-place machines. Designed to ensure accurate and reliable component handling, they are available in multiple configurations to accommodate a wide range of electronic components, including resistors, capacitors, and integrated circuits. Built to withstand high-speed assembly environments, these nozzles offer exceptional durability and longevity, minimizing the risk of component damage during placement.

Availability

Original • Copy New • Quality Guaranteed • Short Delivery Time

Key Features

Universal Compatibility, High Durability, Precision Handling, Flexible Head Design
