

SMT Pick and Place Machine Nozzle Assembly

This nozzle assembly is designed for use in SMT pick and place machines. It ensures accurate and reliable placement of electronic components onto PCBs.

Product Overview

High-Precision SMT Nozzle Assemblies

These professional-grade SMT nozzle assemblies are designed for precision component placement in automated pick-and-place systems. Available in both original new and high-quality compatible formats, they ensure consistent performance and reliability. Featuring durable construction and integrated spring-loaded mechanisms, these nozzles are engineered to maintain high placement accuracy and efficiency in demanding manufacturing environments.

Compatibility & Inventory

Available Nozzle Models

Nozzle Type	Part Number
500	40011046
501	40001339
502	40001340
503	40001341
504	40001342
505	40001343
506	40001344
507	40001345
508	40001346
510	E36157290A0
511	E36167290A0
509	40025165

CVS Series Nozzle Models

- 500 CVS (40010999)
- 502 CVS (40010995)
- 503 CVS (40010996)
- 504 CVS (40010997)
- 505 CVS (40010998)
