

SMT Pick and Place Machine Nozzle Juki 102

This Juki 102 nozzle is designed for use in SMT pick and place machines, models 730-760. It facilitates efficient vacuum suction and release for reliable component placement.

Product Overview

Precision SMT Nozzle for KE730-760 Series

This precision-engineered nozzle is designed specifically for use in SMT (Surface Mount Technology) pick and place machines, compatible with the KE730 through 760 series. Crafted from durable materials, it ensures reliable component handling and placement accuracy during high-volume assembly. The optimized design facilitates efficient vacuum suction and release, helping to minimize component damage and maximize throughput.

Compatibility

Compatible Machine Series	KE730, KE760
