

SMT Pick and Place Machine Nozzle TN045

This SMT nozzle is designed for use in SAMSUNG pick and place machines. The TN045 nozzle ensures accurate and reliable component placement during the surface mount assembly process.

Product Overview

Precision SMT Component Placement

The TN045 is a high-precision SMT pick-and-place nozzle designed for reliability and accuracy in surface mount assembly. Engineered for durability, this component ensures consistent performance during high-speed production cycles. It is specifically optimized to maintain optimal functionality for automated assembly lines requiring precise component handling.

Technical Details

TN045 Model Specifications

Specification	Value
Model Designation	TN045
Part Number	J9055070B
Primary Diameter	0.75 mm
Secondary Diameter	0.38 mm

Compatibility

Compatible Machine Series	CP45, CP45 NEO, CP60
---------------------------	----------------------
