

SMT Placement Machine Nozzle AWP9510

This is a nozzle for SMT placement machines. The AWP9510 nozzle is designed for accurate and reliable component handling.

Product Overview

Precision Component Handling

This high-precision nozzle is engineered specifically for reliable component handling in surface mount technology (SMT) assembly processes. Constructed from durable, industrial-grade materials, it ensures consistent performance and longevity even in demanding production environments. Designed to optimize pick-and-place functionality, this component is an essential tool for maintaining high accuracy in electronic assembly lines.

Technical Specifications

Model Number	AWPH9510
Compatible Machine Series	CP6
Application	SMT Placement
