

SMT Placement Nozzle 503, Dual Orifice Ø 1.0 / Ø 0.6 (1608)

This precision nozzle is designed for automated surface mount technology (SMT) placement equipment. It is suitable for handling 1608 electronic components and features a dual orifice design with diameters of Ø 1.0 mm and Ø 0.6 mm.

Product Overview

Precision SMT Placement Nozzle

The SMT Placement Nozzle 503 is a precision-engineered component designed for automated surface mount technology placement equipment. Featuring a dual orifice design with diameters of Ø 1.0 mm and Ø 0.6 mm, it is optimized for handling electronic components with 1608 dimensions. This nozzle ensures accurate and reliable pick-and-place operations, contributing to consistent performance in high-speed industrial assembly lines.
