

SMT Placement Nozzle for FUJI XP Series

This precision nozzle is designed for use with FUJI XP series SMT pick-and-place machines. It ensures accurate component placement during PCB assembly.

Product Overview

Precision SMT Placement Nozzles

These high-precision placement nozzles are engineered for reliable performance in SMT (Surface Mount Technology) assembly equipment. Designed to ensure accurate component placement during the PCB assembly process, they feature optimized airflow and a secure grip mechanism. Constructed from durable materials, these nozzles are built to provide an extended operational lifespan and consistent performance across the XP series line.

Compatibility

Compatible Series	XP1, XP2, XP3
-------------------	---------------

Technical Specifications

XP1 Nozzle Models

Part Number	Specification
ADEPN-8010	0.4
ADEPN-8020	0.7
ADEPN-8030	1.0
ADEPN-8040	1.3
ADEPN-8050	1.8

XP2 & XP3 Nozzle Models

Part Number	Specification
ADEPN8530	0.7
ADEPN8540	1.0
ADEPN8550	1.3
ADEPN8560	1.8
DEPN3060	2.5
DEPN3070	3.7
DEPN3080	5.0
DEPN3090	7.0
DEPN3100	10
DEPN3110	15
DEPN3120	20
