

SMT Shaft Head Sub Assembly

This is a shaft head sub assembly designed for SMT pick-and-place machines. It is essential for maintaining the precision and reliability of SMT equipment.

Product Overview

Genuine SMT Shaft Head Sub Assembly

This original, new shaft head sub-assembly is engineered for high-precision SMT placement machinery. Designed to ensure reliable performance, it is an essential component for maintaining machine accuracy and operational uptime in electronic component assembly environments.

Identification

Part Number	LC2-M7120-100
-------------	---------------

Component Inventory

Included Components

Component	Quantity
Box Assembly C/R	1
Mother Board Assembly	1
Servo Board Assembly	1
System Unit Assembly	1
Driver Board Assembly	1
D.Power Assembly	1
Panel (No Servo)	2
Panel (No Driver)	1
Fan Motor Assembly	3
SW Power DC5	1
SW Power DC12	1
Trans 1 Assembly	1
Vision Unit Assembly	1
Apple Board Assembly	1
Panel (No Vision)	1
Flash Disk (w/ adapter)	1
CD-ROM	1
