

SMT Transmission Belt for Yamaha

This transmission belt is designed for Yamaha SMT machinery. It ensures efficient power transfer within the SMT equipment for smooth operation.

Product Overview

High-Performance Transmission Belt

This high-quality transmission belt is engineered specifically for use in precision electronic assembly machinery. Designed for durability and consistent power transfer, it ensures smooth operation and helps maintain optimal machine performance. It is an essential component for minimizing equipment downtime in demanding production environments.

Compatibility

Supported Machine Series

- YG12 Series
- YS12 Series
- YS24 Series
- YG200 / YG200L Series

Supported Part Numbers

KGY-M9311-21X, KGY-M9311-00X

Component Inventory

Compatible Nozzle Assemblies

| Component ID | Description |
|---------------|-----------------------|
| KHN-M7710-A1X | NOZZLE 301A ASSY |
| KHY-M7740-A0X | NOZZLE 303A/314A ASSY |
| KGT-M7710-A0X | NOZZLE 201A ASSY |
| KGT-M7720-A0X | NOZZLE 202A ASSY |
