

Snap Hook with Thimble - DIN5299 Form A

This snap hook includes a thimble and is manufactured according to DIN5299 Form A standards. It is constructed from durable metal and designed for secure, reliable connections in various applications.

Product Overview

Professional Utility Snap Hook

The Snap Hook with Thimble, designed to DIN5299 Form A standards, provides a reliable and efficient connection solution for industrial and commercial applications. Engineered from high-strength metal, the integrated thimble design significantly reduces rope or cable abrasion, ensuring longevity and safety. These hooks facilitate rapid attachment and detachment, making them an essential component for secure rigging and tethering tasks.

Technical Specifications

Standard	DIN5299 Form A
Material	Durable Metal

Features

Key Features

- DIN5299 Form A compliant
- Integrated thimble for wear protection
- Heavy-duty metal construction
- Quick-release mechanism

Standards	DIN5299, Form A
