

# SNGQ1207DNT Milling Inserts

These milling inserts are engineered for machining a variety of materials. The SNGQ1207DNT inserts offer excellent chip control and surface finish.

## Product Overview

### High-Performance Milling Inserts

The SNGQ1207DNT milling inserts are precision-engineered to provide stable performance and a long tool service life. Manufactured from 100% new, high-grade carbide materials, these inserts deliver excellent surface finishing and superior chip control for demanding machining environments. They are versatile solutions designed to meet the rigorous requirements of professional milling applications.

## Technical Specifications

Model Designation	SNGQ1207DNT
Material Composition	100% New Carbide, Industrial Grade

## Manufacturing Capabilities

### Customization Requirements

- Customer drawings
- Provided samples

Custom Production	Yes
-------------------	-----

## Product Range

### Additional Tooling Available

- Turning inserts
- Ceramic inserts
- Threading inserts
- Parting and grooving inserts
- Carbide drawing dies
- End mills
- Clamping blades
- Saw tips
- Carbide rods
