Product Overview

Professional Marine Guiding Solution

The Socket Type B Marine Roller is a robust component engineered for reliable rope and cable guidance on ships, docks, and maritime structures. Built to withstand demanding offshore conditions, it offers smooth operation and minimal maintenance requirements. With versatile material options and customizable configurations, this roller ensures seamless integration into various peripheral ship equipment.

Technical Dimensions

Available Diameters

- 150
- 200
- 250
- 300
- 350
- 400

Height Variants

- 211
- 251
- 298
- 321
- 346
- 371

Construction

Surface Treatment

- Sandblasting pre-treatment
- Epoxy zinc rich primer coating
- Anode oxidation-treatment

Material Composition

Steel, Stainless Steel, Aluminum

Compliance & Services

Marine Classifications

ABS • CCS • BV • GL

Customization & OEM

Yes
