

# Socket Weld Forged Steel Ball Valve

This socket weld ball valve is suitable for applications in oil fields, chemical industries, and coal mines. It provides good tightness for environmental protection.

## Product Overview

### Industrial Forged Steel Ball Valve

This three-piece forged steel ball valve is engineered for demanding industrial environments where reliability and tight shutoff are critical. Utilizing high-quality A105 forged steel, it ensures exceptional durability under high-pressure and high-temperature operating conditions. The socket weld connection design facilitates a secure, leak-proof integration into piping systems, making it an ideal choice for intensive flow control applications.

## Technical Specifications

Body Material	A105 Forged Steel
Connection Type	Socket Weld
Design	3-Piece Ball Valve
Nominal Size	1/2 inch (DN)

## Certifications and Features

Key Features	High Pressure, High Temperature, Forged Steel, Industrial Grade
