

Software

Software to enhance computer hardware and software capabilities. It is suitable for various applications.

Overview

Professional Stadium Display Solution

This advanced software solution is engineered for high-impact visual delivery in large-scale stadium environments. Designed for seamless integration with massive LED arrays, it enables real-time playback of live footage, athlete tracking, and dynamic advertising content. The system ensures crystal-clear clarity for live sport broadcasting, replay management, and stadium-wide communications.

Key Features

Core Functionalities

- Live sporting event broadcast integration
- High-definition replay management
- Dynamic advertising and brand sponsorship display
- Athlete performance and bib number tracking
- Stadium-wide information broadcast

Application

Ideal Deployment Environments

Professional Stadiums, Track and Field Arenas, Large-scale Public Venues
