Product Overview

High-Performance Compaction Technology

This vibratory roller compactor is engineered for superior performance across a wide range of construction industry applications. Designed to handle both gravel and asphalt surfaces, it provides consistent compaction for both expansive and confined areas. Each unit undergoes rigorous performance inspection before leaving the factory to ensure reliability and operational excellence on every job site.

Technical Specifications

Rated Power

10 HP

Horsepower

7.3 kW

Power Output

Model Identifier

HP-R600D

Engine Model

HP186FAE Diesel

Application Suitability

Operational Scope

- Large construction areas
- Confined spaces

Compatible Surfaces

Gravel, Asphalt, Soil
