

Soil Compaction Plate

This plate compactor is designed for efficient soil compaction in construction and landscaping projects. The durable steel base plate ensures even distribution of force and long-lasting performance.

Overview

Professional Soil Compaction

This plate compactor is engineered for high-efficiency soil compaction in demanding construction and landscaping environments. Featuring a robust engine and a durable steel base plate, it delivers consistent impact force to ensure optimal surface density. It is an ideal solution for professionals needing to compact soil, gravel, and asphalt to achieve a solid, level foundation.

Technical Specifications

Engine Power

5.5 HP

Rated Power

Suitable Applications

Soil, Gravel, Asphalt, Landscaping, Construction

Design Features

Key Performance Attributes

- High impact force delivery
- Even force distribution
- Long-lasting performance

Construction Material

Durable Steel
