

# Soil Compaction Plate

This plate compactor is designed for compacting soil, gravel, and asphalt surfaces. The durable steel base plate ensures even compaction, while the ergonomic handle enhances operator comfort and control.

## ADDITIONAL IMAGES

## Product Overview

### Professional Soil Compaction

This robust plate compactor is engineered for high-performance soil, gravel, and asphalt compaction. Powered by a reliable 3.6KW engine, it delivers a consistent 15kN impact force to ensure stable foundations for pathways, trenches, and general construction site preparation. The design includes an open plate to minimize debris buildup and heavy-duty shock mounts to enhance operator comfort during extended use.

## Technical Specifications

Engine Model	GX160
Rated Power	3.6 KW
Impact Force	15 kN
Compaction Depth	30 cm
Vibration Frequency	5600 V.P.M

## Physical Dimensions

Net Weight	58 kg
Base Plate Dimensions	34 x 28.5 cm
Package Dimensions	595 x 475 x 400 mm

## Certifications & Features

### Key Features

- Portable and foldable handle
- Open plate design reduces dirt building
- Centrally mounted exciter for even force distribution
- Heavy-duty shock mounts for vibration reduction
- Front turn-up base for corner access
